Our vision is to form the next generation of Christian leaders, ready to transform their communities and nation.
We are an organization with 30 years of experience and success helping children at risk.

Celebrating Success and Springing Forward To The New

Whenever we launch a new project and set a new goal it takes faith and vision, firstly to communicate it and secondly to believe that with the support and partnership of others, the idea can become a reality. That's why the recent dedication of our new computer classroom was an emotional and rewarding moment. I literally saw the jaws of our students dropping as they walked into an immaculate new classroom, equal to any IT class in America. We are so thankful to God and to you for your faithfulness.

So, now it's time to dream again, last month you should have received a special brochure from us with three new projects which are all great needs which we have in Brazil. Firstly there is the well we want to dig to bring water from an aquifer at the bakery site, cost \$9,750. Secondly, we have an urgent maintenance that needs to be done on the gym, costing \$11,350. Thirdly we have to re-inforce the physical walls of the CBC so that the compound, our staff and the children remain safe., costing \$7,500. Please contact us if you have any questions about these projects or want to get involved.

Thank you! Marcondes Marques

Mission Accomplished!

CBC's new computer Classroom is completed!

After many years of dreaming, CBC is finally celebrating the completion of the new computer classroom, equipped with air conditioning and 19 brand new computers.

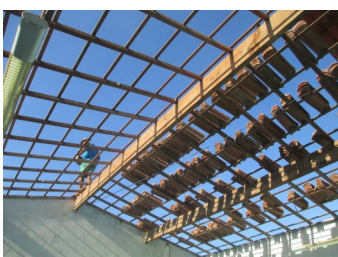

The classroom was officially opened on the first day of term (2nd February) with a ribbon cutting ceremony and a party to celebrate this tremendous achievement.

It was an absolute treat to watch the faces of the children as they walked into the room for the first time. They were so amazed at the transformation and in some cases emotionally overwhelmed that someone would make such a facility just for them.

Emiliano, CBC's computer teacher is excited about the possibilities now open to him, particularly with older students who express so much interest in IT.

The work was completed in three months and included the re-tiling the roof, installing new electrics, lighting and networking cables, a new ceiling, granite work benches, re-plastered walls, installation of air conditioning and the computers.

Our deepest thanks to everyone who contributed towards this project and helped us set up a classroom that will stand up to the climate, look after our computers and most importantly be a place of much learning!

Removal of old roof

Brick vents filled in, new insulated door installed.

New roofing tiles

Ribbon Cutting

Ceiling & painting & installation of counters
